All around me I see how technology could make lives easier, but their interfaces are simply too complicated for the average user. I aim to reduce these learning barriers for users, so that they can enjoy everything a product has to offer. I am very detail-oriented, and thrive when faced with challenges and learning curves.

Experience

UX & UI Designer / CLC Group June 2019 - Present

- Work with a team of developers to build a service that uses cutting edge technology
- Create all wireframes and interactive prototypes needed
- Design and execute all usability tests
- Work within a tight budget

UX Designer / Breaking Barriers (Project) September 2020 - Present

- Work with a new non-profit organization to create a network for girls interested in tech with the goal of providing resources and teaching skills needed in the industry
- Lead UX & UI, and web development teams in weekly tasks
- Work with the web development team to create needed websites

UX & UI Designer / Rugged Roads (Project) November 2019

- Progressed from an idea to an interactive prototype within 32 hours
- Led the initiative to create and refine a list of goals, functions, and features needed for the application
- Conducted in-person user research surveys and single-handedly created low-fi wireframes and an interactive prototype
- User Tested the prototype with very good results
- Presented the app with my team to a panel of judges, winning 3rd place

Product Design / Build-a-Bug (Project) January 2017 - August 2018

- Designed and built an activity for all ages for the Ohio State University's Museum of Biological Diversity's Open House
